

PERCENT WEIGHTINGS IN SENIOR HIGH SCHOOL SCIENCE

The weightings are provided as percentages because understanding of different science concepts may take varying amounts of time to develop, depending upon the individual learning styles and abilities of students. These weightings should be considered as approximations of curriculum emphasis as teachers may need to focus on some topics more than others, depending upon student interests and abilities.

Each course is designed for approximately 125 hours; however, teachers may modify the amount of instructional time to meet the individual needs of students.
