
GERMAN LANGUAGE ARTS KINDERGARTEN TO GRADE 9

INTRODUCTION

German language arts is an integral part of German bilingual programming. The German Language Arts Kindergarten to Grade 9 Program of Studies reflects the breadth of German bilingual programming by providing outcomes for learning language and for learning about culture. However, German bilingual programming as a whole includes many other learning experiences of which language and culture are only a part. In addition to German language arts and English language arts, German bilingual programming also includes various other subject-area experiences. The following conceptual map illustrates the relationship among these components.

The achievement of the outcomes in the German Language Arts Kindergarten to Grade 9 Program

of Studies is not necessarily the sole responsibility of the German language arts teacher. These outcomes may be achieved through a variety of bilingual programming experiences.

BILINGUAL PROGRAMMING OVERVIEW

Bilingual programming is complex and multifaceted. It provides a rich environment for the learning of languages, cultures and subject-area content. Bilingual education strives to provide intensive language learning environments, with the potential for high academic achievement and enriched cultural experiences that maximize student opportunities for learning.

Effective bilingual learning environments are those where:

- the individual and collective needs of students are met
- there is a supportive climate that encourages risk taking and choice
- diversity in learning styles is accommodated
- connections to prior knowledge and experiences are made
- there is exposure to a wide range of excellent models of authentic language
- use of the specific heritage and international language is emphasized

- quality oral, print, visual and multimedia resources are available and applied in a supportive, meaningful and purposeful manner.

RATIONALE FOR GERMAN BILINGUAL PROGRAMMING AND GERMAN LANGUAGE ARTS

The German language is important in Alberta and the world

German is the mother tongue for approximately 120 million people worldwide; it is the official language of Austria and Germany, and it is one of several official languages in Liechtenstein, Luxembourg and Switzerland. The use of German as a major language of business has been increasing in recent years.

Alberta has important linguistic, cultural and heritage links with many regions of the German-speaking world. German bilingual programming builds on these links and opens the door to a broader range of educational, career and leisure opportunities.

German bilingual programming contributes to personal development

German bilingual programming establishes an environment in which both English and German are used and needed constantly for purposes of communication, personal satisfaction and learning. Students have numerous opportunities to learn and use language in meaningful, purposeful ways to meet their needs, interests and abilities. In bilingual programming, the delivery of subject-area content, language instruction and cultural information often occurs concurrently, promoting effective language acquisition.

German language learning is a lifelong endeavour

Language learning is an active process that begins at birth and continues throughout life. Language is acquired at various rates throughout a learner's stages of growth. It develops gradually. Students enhance their language abilities by applying their knowledge of language in new and more complex contexts and with increasing sophistication. They reflect on and use prior knowledge to extend and enhance their language knowledge and understanding. Errors are an integral part of the language learning process. By learning, experimenting with and applying new language structures and vocabulary in a variety of contexts, students develop and refine language proficiency.

German bilingual language learning fosters cross-language competence

Most children develop a strong repertoire of language skills in their first language in preschool years. Many of these skills are transferable to the new language learning context that German bilingual programming provides. Similarly, in acquiring a new language, students develop new language learning skills that can be used in their first language. The continuous, concurrent development of first and second language skills, or skills in additional languages, is fostered in German bilingual programming. Opportunities for linguistic knowledge and skill development in both languages are maximized.

German bilingual language learning enhances all communication skills

The development of communication skills is essential in effective bilingual programming. The six skill areas of listening, speaking, reading, writing, viewing and representing contribute to the development of effective communication. These skills are interrelated and interdependent. Facility in one strengthens and supports the others. Proficiency in these language skills involves the development of comprehension and language production. The German Language Arts Kindergarten to Grade 9 Program of Studies is designed to promote the development of language

skills for a variety of purposes, in a wide range of contexts, at increasing levels of fluency.

German bilingual language learning develops through the communicative approach

The communicative approach in second language instruction emphasizes the importance of communicating a message. In the German bilingual program, students require support as they strive to express and understand thoughts, ideas and feelings in two languages. The accuracy of language, oral or written, although important for precision of communication, is secondary to communicating the message.

The communicative approach acknowledges the important relationship between accuracy and effective communication, but places slightly less emphasis on accuracy and form.

German bilingual language learning promotes the acquisition of learning strategies

German language acquisition in bilingual programming is effectively supported by providing students with explicit instruction in language learning strategies, language use strategies and general learning strategies. The Specific Language Component of the German Language Arts Kindergarten to Grade 9 Program of Studies provides a variety of learning outcomes at all levels to promote the acquisition of these strategies.

German bilingual programming promotes intracultural and intercultural awareness

Language and culture are intensely intertwined. Language is a primary means by which cultural information is transmitted. Culture influences linguistic form and content. Students in German bilingual programming bring to their programs a wide range of cultural backgrounds and experiences. The German Language Arts Kindergarten to Grade 9 Program of Studies provides opportunities and support for students to explore their own cultural backgrounds, experiences and identities, as well as those of members of the school community, the local community and other communities of the world. The Culture section of this program of studies

examines the dynamic nature of culture through the various perspectives of history, diversity and change. It also provides opportunities to explore similarities and differences among and within world cultures.

German bilingual programming develops global citizenship skills

Effective participation in the global marketplace, workplace and society requires strong communication, interpersonal and team skills, and strong knowledge and understanding of cultures. German bilingual programming provides a rich environment for the development of essential knowledge, skills and attitudes that promote the development of effective global citizens and enhance the economic and career potential of students. The German Language Arts Kindergarten to Grade 9 Program of Studies supports the intellectual, social, emotional, creative, linguistic and cultural development of students in German bilingual programming.

A SPIRAL PROGRESSION

Language learning is integrative, not merely cumulative. Each new element that is added must be integrated into the whole of what has gone before. The model that best represents the students' language learning progress is an expanding spiral. Student progression is not only vertical (e.g., increased proficiency), but also horizontal (e.g., broader range of applications and experience with more text forms, contexts and so on). The spiral also represents how language learning activities are best structured. Particular vocabulary expressions, learning strategies or cultural skills and knowledge, for example, are revisited at different points in the German language arts program, but from a different perspective, in broader contexts or at a slightly higher level of proficiency each time. Learning is reinforced, extended and broadened with each successive pass.

PURPOSE OF THE PROGRAM OF STUDIES

The German Language Arts Kindergarten to Grade 9 Program of Studies provides a progression of specific outcomes from Kindergarten to Grade 9. Most often, the outcomes reflect a progression of development intended to match the developmental stages of students. The specific outcomes for each grade reflect the knowledge, skills and attitudes that students are expected to achieve by the end of the grade. Students are expected to demonstrate the specific outcomes for the current grade and build upon their prior knowledge and skills from previous grades.

The outcomes presented are designed to represent the progression of knowledge, skills and attitudes expected of students with no prior exposure to German upon entry into Kindergarten. However, students with prior exposure to German can also be challenged within the program.

The general and specific outcomes established in this program of studies are intended to be delivered in an integrated manner.

PROGRAM OVERVIEW

For ease of use, the German Language Arts Kindergarten to Grade 9 Program of Studies is divided into two sections:

- Language Arts
 - General Language Component
 - Specific Language Component
- Culture

It is important that the sections be implemented in an integrated manner.

Language Arts

The Language Arts section of this program of studies reflects an integrated, interdependent approach to language learning within a bilingual programming context. German language arts includes a General Language Component and a Specific Language Component.

The General Language Component parallels *The Common Curriculum Framework for English Language Arts, Kindergarten to Grade 12: Western Canadian Protocol for Collaboration in Basic Education*, 1998. In this manner, both English language instruction and German language instruction support the development of common language knowledge, skills and attitudes. The general outcomes in the General Language Component, with only minor revisions, mirror those in the English Language Arts Framework, but the specific outcomes have been adapted and refined more extensively for delivery in German.

The Specific Language Component provides the detailed linguistic elements of the German language, descriptors of language competence for each grade, and outcomes to support sociocultural/ sociolinguistic and strategic learning.

The Specific Language Component outlines the linguistic elements that students will need in order to use the German language, while the General Language Component provides the context and purpose for using the language, and outlines the knowledge, skills and attitudes that students are to develop. The two components should be developed concurrently, so that the language being

learned is the language that students will need and be able to apply.

Culture

The Culture section fosters the development of essential knowledge, skills and attitudes related to self, German language and cultures, the community and the world. “German cultures” refers to the cultures of German-speaking peoples.

General Outcomes

General outcomes are broad statements that form the basis of this program of studies. Each general outcome outlines the key learnings that each section of the program is designed to support. The general outcomes describe the common goals that all students in the German Language Arts Kindergarten to Grade 9 learning sequence are expected to achieve.

German bilingual programming is designed to promote all-round personal development by fostering social, emotional, moral, intellectual and creative growth. To support this growth and development, the German Language Arts Kindergarten to Grade 9 program is built upon the following seven general outcomes.

Language Arts: General Language Component

General Outcome 1

Students will listen, speak, read, write, view and represent in German to explore thoughts, ideas, feelings and experiences.

General Outcome 2

Language Arts: Specific Language Component

General Outcome 6

Students will use German confidently and competently in a variety of situations for communication, personal satisfaction and further learning.

Culture

General Outcome 7

Students will explore, understand and appreciate the cultures of German-speaking peoples for personal growth and satisfaction, and for participating in, and contributing to, an interdependent and multicultural global society.

Specific Outcomes

Each general outcome includes specific outcomes that students are to achieve by the end of each grade. Specific outcomes are grouped under cluster headings within each of the seven general outcomes. The specific outcomes are further categorized by strands identified in the left margin. Grade-specific descriptions are then provided for each specific outcome at each grade level. A specific strand supporting a general outcome is developed over three consecutive pages, according to the main grade divisions: Kindergarten to Grade 3, Grade 4 to Grade 6, and Grade 7 to Grade 9.

It is strongly recommended when addressing any specific outcome in this program of studies that the specific outcomes prior to and following the given outcome and grade level be consulted for a clearer understanding as to context and intended developmental sequence. Similarly, any given specific outcome must be understood with reference to the strand and general outcome categories.

LANGUAGE ARTS

General Language Component

The General Language Component has been structured and developed similarly to *The Common Curriculum Framework for English Language Arts, Kindergarten to Grade 12: Western Canadian Protocol for Collaboration in Basic Education*, 1998, but it has been adapted for delivery in German. The General Language Component provides the context and purpose for the development and use of the German language.

The commonalities with the English Language Arts Framework facilitate an integrated, contextualized approach to language learning. They also establish essential language learnings that are common to both English and German language programming, supporting and promoting a collaborative and integrated approach to language instruction.

The specific outcomes established for each grade level reflect achievement expectations to be demonstrated in German.

LANGUAGE ARTS

Specific Language Component

The Specific Language Component provides the linguistic elements of the German language that students are expected to acquire at various grade levels. The linguistic elements that are addressed include the sound–symbol system, vocabulary, grammatical elements, mechanical features and discourse features. The Specific Language Component also provides descriptors of proficiency at each grade level in the areas of listening, speaking, reading, writing, viewing and representing, as well as outcomes to support sociocultural/sociolinguistic competence and strategic learning.

The Specific Language Component is intended to outline the linguistic skills that students will need in order to achieve the outcomes in the General Language Component. The two components are interrelated and are intended to be delivered in an integrated manner.

Strategies in the Specific Language Component are grouped under three cluster headings—language learning strategies, language use strategies and general learning strategies. Each of the strands under these cluster headings deals with a specific category of strategy. Language learning and general learning strategies are categorized as cognitive, metacognitive and social/affective. The language use strategies are organized by communicative mode: interactive, interpretive, productive.

The strategies that students choose depend on the task they are engaged in as well as on other factors, such as their preferred learning style, personality, age, attitude and cultural background. Strategies that work well for one person may not be effective for another person, or may not be suitable in a different situation. For this reason it is not particularly useful to say that students should be aware of, or able to use, a specific strategy in a particular grade. Consequently, the specific outcomes describe the students' knowledge of and ability to use general types of strategies. More specific

strategies for each general category or type are included in the sample list of strategies below. The specific strategies provided in the sample list **are not prescriptive** but are provided as an illustration of how the general strategies in the specific outcomes might be developed.

Teachers need to know and be able to demonstrate a broad range of strategies from which students are then able to choose in order to communicate effectively. Strategies of all kinds are best taught in the context of learning activities where students can apply them immediately and then reflect on their use.

Sample List of Strategies

- interpret and use a variety of nonverbal clues to communicate, e.g., mime, pointing, gestures, drawing pictures
- indicate lack of understanding verbally or nonverbally, e.g., *Wie bitte?*, *Entschuldigung?*, *Das habe ich nicht verstanden*; raised eyebrows, blank look
- ask for clarification or repetition when you do not understand, e.g., *Was meinst du damit?*, *Kannst du das bitte wiederholen?*
- use other speakers' words in subsequent conversations

- assess feedback from a conversation partner to recognize when a message has not been understood, e.g., raised eyebrows, blank look

CULTURE

The Culture section supports the development, in each student, of a positive self-concept, a strong self-identity, in each student, as a bilingual/multicultural learner and a positive identification with the German language and cultures. This section provides opportunities for the exploration of German cultures from the perspectives of historical elements, contemporary elements, diversity and change. It promotes the development of a sense of community, an understanding of similarities and differences among people, and an appreciation for personal contributions to society. It is also designed to help students develop an understanding of global interrelatedness and interdependence, as well as cultural sensitivity, and to support their preparation for effective participation in the global marketplace and workplace.

The Culture section is intended to be integrated with language learning, as well as learnings related to other subject areas, and is an essential part of daily activities in German bilingual programming. **This program of studies divides the Language Arts and Culture sections for ease of use only.**

While German cultural learning is unquestionably best conducted in German, certain concepts may be too complex to be undertaken in the language. On such occasions, limited and judicious use of English may be resorted to in order to facilitate learning.
