

PISA 2015 – MATHEMATICS
 (average scores and confidence intervals for countries, economies, and provinces)

Notes:

Orange markers represent the average scores of countries/economies/provinces and the bars represent their 95% confidence intervals. Area shaded in blue is Alberta's score with its confidence intervals.

The OECD average was 490. The chart shows only a selection of countries/economies participating in PISA 2015. Countries/economies with average scores lower than 475 are not included in the chart.
