# GERMAN LANGUAGE AND CULTURE

## 10-3Y, 20-3Y, 30-3Y

---

This German Language and Culture Three-year (3Y) Program is intended for students who are beginning their study of German language and culture in senior high school.

### INTRODUCTION

Studying the German language opens the door to understanding and participating in an influential world culture with close relationships to both the English language and our contemporary way of life.

Communication with people living in much of northern and central Europe is possible for those who know the German language. Approximately 120 million people speak German; it is the official language of Austria and Germany, and it is one of several official languages in Liechtenstein, Luxembourg and Switzerland. In Belgium and Denmark, German is a language with special status.

German can be an important key to communication in many parts of the world beyond the German-speaking nations as well. In eastern Europe, for example, the use of German as a major language of business has been increasing in recent years. According to Canada's 2001 Census, German is Canada's fifth most common mother tongue. In Alberta, about 78 000 people reported German as their mother tongue in that same year.

Learning German as another language is to embark on a profound experience of cross-cultural exploration. Contributions from German culture have shaped such areas as science, technology, music, religion and politics, to name but a few. Over the centuries, German has had significant impact, in both positive and negative ways, far beyond the borders of nations where the language is spoken.

For those students who already have some knowledge of German, or a family connection to the culture, there is the opportunity to renew contact with their ancestral language and culture or to maintain and develop literacy in a first language that is not the majority language in the community.

The value, for Canadian society as a whole, of learning German can be summarized as follows. Learning German leads to:

- an increased awareness of, and sensitivity to, cultural and linguistic diversity
- an enhanced role in the international community
- improved potential in the Canadian and the global marketplace and workplace.

There are also many personal reasons for learning German. Students who have no previous knowledge of the language can look forward to:

- more opportunity to communicate directly with German-speaking people and gain a deeper insight into their own culture and language
- a broader range of educational, career and leisure opportunities
- the opportunity to meet the entrance requirements of many post-secondary institutions in Alberta and across Canada.

Students receive additional, indirect benefits from learning German as another language, including:

- development of increased competence in their use of English or in other languages they may know
- enhanced cognitive functioning, particularly an increased ability to conceptualize and to think abstractly; more cognitive flexibility; and greater divergent thinking, creativity and metalinguistic competence.

## ASSUMPTIONS

The following statements are assumptions that have guided the development process of this program of studies.

- Language is communication.
- Language is culture.
- All students can be successful learners of language and culture, although they will learn in a variety of ways and acquire proficiency at varied rates.
- All languages can be taught and learned.
- Learning German as another language leads to enhanced learning in both the student's primary language and in related areas of cognitive development and knowledge acquisition. This is true of students who come to the class with some background knowledge of German and develop literacy skills in the language. It is also true for students who have no cultural or linguistic background in German and are studying German as a second language.

## THE CONCEPTUAL MODEL

The aim of this program of studies is the development of communicative competence in the German language.

### Four Components

For the purposes of this program of studies, communicative competence is represented by four interrelated and interdependent components.

**Applications** deal with what the students will be able to do with the language, the functions they will be able to perform and the contexts in which they will be able to operate.

**Language Competence** addresses the students' knowledge of the language and their ability to use that knowledge to interpret and produce meaningful texts appropriate to the situations in which they are used.

**Global Citizenship** aims to develop intercultural competence, with a particular focus on cultures associated with German.

**Strategies** help students learn and communicate more effectively and more efficiently.

Each of these components is described more fully at the beginning of the corresponding section of this program of studies.

### Modes of Communication

Because of the focus on using language to communicate in specific contexts, with a particular purpose or task in mind, three modes of communication are used to organize some of the specific outcomes.

**Interaction** is most often direct, face-to-face oral communication, but it can take the form of written communication between individuals, using a medium such as e-mail where the exchange of information is fairly immediate. It is characterized principally by the opportunity to actively negotiate meaning; that is, helping others

understand and working to understand others. Interactive communication generally requires more speed but less accuracy than the other two modes.

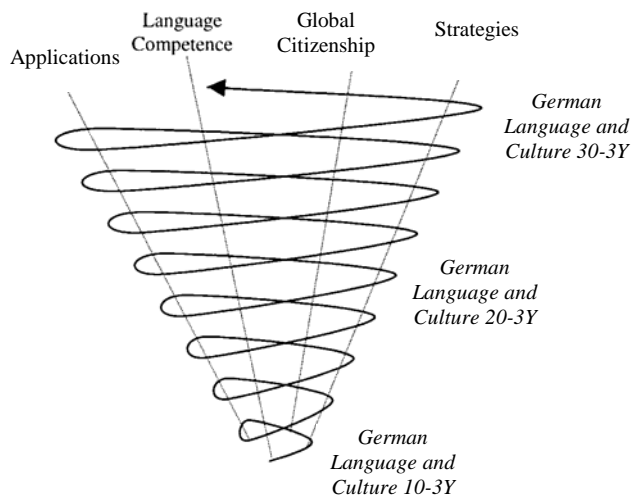

**Interpretation** is receptive communication of oral and written messages in contexts where the listener or reader is not in direct contact with the creator of the message. While there is no opportunity to ask for clarification, there is sometimes the possibility of rereading or listening again, consulting references, or making the meaning clearer in other ways. Reading and listening will sometimes involve **viewing** and interpreting visual elements, such as illustrations in books or moving images in television and film. Interpretation goes beyond a literal comprehension to include an understanding of some of the unspoken or unwritten meaning intended by the speaker or author.

**Production** is communication of oral and written messages in contexts where the audience is not in personal contact with the speaker or writer, or in situations of one-to-many communication; e.g., a lecture or a performance where there is no opportunity for the listener to interact with the speaker. Oral and written presentations will sometimes be enhanced by **representing** the meaning visually, using pictures, diagrams, models, drama techniques or other nonverbal forms of communication. Greater knowledge of the language and culture is required to ensure that communication is successful, since the participants cannot directly negotiate meaning.

### A Spiral Progression

Language learning is integrative, not merely cumulative. Each new element that is added must be integrated into the whole of what has gone before. The model that best represents the students' language learning progress is an expanding spiral. Their progression is not only vertical (e.g., increased proficiency) but also horizontal (e.g., broader range of applications and experience with more vocabulary, text forms, contexts and so on). The spiral also represents how language learning activities are best structured. Particular lexical fields, learning

strategies or language functions, for example, are revisited at different points in the program, but from a different perspective, in broader contexts or at a slightly higher level of proficiency each time. Learning is reinforced, extended and broadened with each successive pass.

## ORGANIZATION OF THE PROGRAM OF STUDIES

### General Outcomes

General outcomes are broad statements identifying the knowledge, skills and attitudes that students are expected to achieve in the course of their language learning experience. The four general outcomes serve as the foundation for this program of studies and are based on the conceptual model outlined above.

#### Applications [A]

- Students will use German in a variety of **situations** and for a variety of **purposes**.

#### Language Competence [LC]

- Students will understand and produce German **effectively** and **competently** in spoken and written forms.

#### Global Citizenship [GC]

- Students will acquire the knowledge, skills and attitudes to be effective **global citizens**, through the exploration of the cultures of the German-speaking world.

### **Strategies [S]**

- Students will know and use various strategies to maximize the **effectiveness** of learning and communication.

The order in which the general outcomes are presented in the program of studies does not represent a sequential order, nor does it indicate the relative importance of each component. The general outcomes are to be implemented in an integrated manner.

### **Specific Outcomes**

Each general outcome is further broken down into specific outcomes that students are to achieve by the end of each course. The specific outcomes are interrelated and interdependent. In most classroom activities, a number of learning outcomes will be dealt with in an integrated manner.

The specific outcomes are categorized under cluster headings, which show the scope of each of the four general outcomes. These headings are shown in the table on the following page.

The specific outcomes are further categorized by strands, which show the developmental flow of learning from the beginning to the end of the program. However, an outcome for a particular course will not be dealt with only in that particular year of the program. The spiral progression that is part of the conceptual model means that activities in the years preceding will prepare the ground for acquisition and in the years following will broaden applications.

# General Outcomes

## Applications

Students will use German in a variety of **situations** and for a variety of **purposes**.

- A-1 to receive and impart information
- A-2 to express emotions and personal perspectives
- A-3 to get things done
- A-4 to form, maintain and change interpersonal relationships
- A-5 to extend their knowledge of the world
- A-6 for imaginative purposes and personal enjoyment

## Language Competence

Students will understand and produce German **effectively** and **competently** in spoken and written forms.

- LC-1 interpret and produce oral texts
- LC-2 interpret and produce written texts, graphics and images
- LC-3 attend to form
- LC-4 apply knowledge of how discourse is organized, structured and sequenced in German
- LC-5 apply knowledge of the sociocultural context

## Global Citizenship

Students will acquire the knowledge, skills and attitudes to be effective **global citizens**, through the exploration of the cultures of the German-speaking world.

- GC-1 historical and contemporary elements of the cultures of German-speaking peoples
- GC-2 affirming and valuing diversity
- GC-3 personal and career opportunities

## Strategies

Students will know and use various strategies to maximize the **effectiveness** of learning and communication.

- S-1 language learning
- S-2 language use
- S-3 general learning

# Applications

## APPLICATIONS

The specific outcomes under the heading Applications deal with **what** the students will be able to do with the German language; that is, the **functions** they will be able to perform and the **contexts** in which they will be able to operate.

The functions are grouped under six cluster headings—see the illustration on the preceding page. Under each of these headings there are one or more strands that show the developmental flow of learning from course to course. Each strand, identified by a strand heading at the left end of a row, deals with a specific language function; e.g., share factual information. Students at any grade/course level will be able to share factual information. Beginning learners will do this in very simple ways. As students gain more knowledge and experience, they will broaden the range of subjects they can deal with, they will learn to share information in writing as well as orally, and they will be able to handle formal and informal situations.

Different models of communicative competence have organized language functions in a variety of ways. The organizational structure chosen here reflects the needs and interests of students in a classroom where activities are focused on meaning and are interactive. For example, the strand entitled “manage group actions” has been included to ensure that students acquire the German language skills necessary to function independently in small groups, since this is an effective way of organizing second language classrooms. The strands under the cluster heading “to extend their knowledge of the world” will accommodate a content-based approach to language learning where students learn content from another subject area as they learn the German language.

The level of linguistic, sociolinguistic and discourse competence that students will exhibit when carrying out the functions is defined in the specific outcomes for Language Competence for each course. To know how well students will be able to perform the specific function, the Applications outcomes must be read in conjunction with the Language Competence outcomes.

## General Outcome for Applications

Students will use German in a variety of **situations** and for a variety of **purposes**.

### A-1 to receive and impart information

	German Language and Culture 10-3Y	German Language and Culture 20-3Y	German Language and Culture 30-3Y
	<i>Students will be able to:</i>		
A-1.1 share factual information	a. understand and respond to simple questions b. identify people, places and specific things c. ask for and provide basic information	a. seek out and provide information on a range of familiar topics b. describe several aspects of people, places and things c. describe series or sequences of events or actions	a. recount events that took place in the past b. understand and use definitions, comparisons and examples c. provide information on several aspects of a topic; e.g., give a simple report

### A-2 to express emotions and personal perspectives

	<i>Students will be able to:</i>		
A-2.1 share ideas, thoughts, opinions, preferences	a. express a personal response and simple preferences b. ask about and identify favourite people, places, things and activities	a. express a personal response to a variety of situations b. inquire about and express preferences, and give simple reasons for preferences c. record and share thoughts and ideas with others	a. express, support and discuss opinions b. inquire about and express probability and certainty; e.g., <i>vielleicht, wahrscheinlich, bestimmt</i>
A-2.2 share emotions, feelings	a. identify and use expressions for a variety of emotions and feelings; e.g., ask and respond to questions about well-being ( <i>Wie geht's?</i> )	a. inquire about, express and respond to emotions and feelings in a variety of familiar contexts; e.g., <i>Es tut mir leid. Das ist ja schön</i>	a. discuss and compare how people express emotions and feelings in a variety of situations

## LANGUAGE COMPETENCE

**Language competence** is a broad term that includes linguistic or grammatical competence, discourse competence, sociolinguistic or sociocultural competence and what might be called textual competence. The specific outcomes under Language Competence deal with knowledge of the German language and the ability to use that knowledge to interpret and produce meaningful texts appropriate to the situations in which they are used. Language competence is best developed in the context of activities or tasks in which the language is used for real purposes; in other words, in practical **applications**.

The various components of language competence are grouped under five cluster headings—see the illustration on the preceding page. Under each of these headings there are several strands, identified by strand headings at the left end of each row, which show the developmental flow of learning from course to course. Each strand deals with a single aspect of language competence. For example, under the cluster heading “attend to form,” there is a strand for phonology (pronunciation, stress, intonation), orthography (spelling, mechanical features), lexicon (vocabulary words and phrases) and grammatical elements (syntax and morphology).

Although the outcomes isolate these individual aspects, language competence should be developed through classroom activities that focus on meaningful uses of the German language and on **language in context**. Tasks will be chosen based on the needs, interests and experiences of students. The vocabulary, grammar structures, text forms and social conventions necessary to carry out a task will be taught, practised and assessed as students are involved in various aspects of the task itself, **not in isolation**.

Strategic competence is often closely associated with language competence, since students need to learn ways to compensate for low proficiency in the early stages of learning if they are to engage in authentic language use from the beginning. This component is included in the language use strategies in the Strategies section.

Grammatical elements that appear only in the “in modelled situations” or “in structured situations” sections still need to be evaluated. It is understood that it may take students some time before they are able to use these elements independently and consistently. Evaluation practices should reflect the developmental nature of the learning process.

1. Modelled Situations: This term is used to describe learning situations where a model of specific linguistic elements is consistently provided and immediately available. Students in such situations will have an emerging awareness of the linguistic elements and will be able to apply them in very limited situations. Limited fluency and confidence characterize student language.

## General Outcome for Language Competence

Students will understand and produce German **effectively** and **competently** in spoken and written forms.

2. Structured Situations: This term is used to describe learning situations where a familiar context for the use of specific linguistic elements is provided and students are guided in the use of these linguistic elements. Students in such situations will have increased awareness and emerging control of the linguistic elements and will be able to apply them in familiar contexts with teacher guidance. Student language is characterized by increasing fluency and confidence.

## **GLOBAL CITIZENSHIP**

The learning outcomes for Global Citizenship deal with the development of intercultural competence, encompassing some of the knowledge, skills and attitudes that students need in order to be effective global citizens. The concept of global citizenship encompasses citizenship at all levels, from the local school and community to Canada and the world.

The various components of global citizenship are grouped under three cluster headings—see the illustration on the preceding page. Under each of these headings there are several strands, identified by strand headings at the left end of each row, which show the developmental flow of learning from course to course. Each strand deals with a single aspect of intercultural competence. For example, under the cluster heading “historical and contemporary elements of the cultures of German-speaking peoples,” there are strands for gaining/applying knowledge of German cultures, diversity within German cultures, analyzing cultural knowledge and valuing German cultures.

Developing cultural knowledge and skills is a lifelong process. Knowledge of one’s own culture is acquired over a lifetime. Cultures change over time. Within any national group, there may be a dominant culture or cultures and a number of additional cultures. Rather than developing a bank of knowledge about German cultures, it is more important for students to develop skills in accessing and understanding information about cultures and in applying that knowledge for the purposes of interaction and communication. Students will gain cultural knowledge in the process of developing these skills. In this way, if they encounter elements of the German cultures they have not learned about in class, they will have the skills and abilities to deal with them effectively and appropriately.

The “affirming and valuing diversity” heading covers knowledge, skills and attitudes that are developed as a result of bringing other languages and cultures into relationship with one’s own. There is a natural tendency when learning a new language and culture to compare it with what is familiar. Many students leave a second language learning experience with a heightened awareness and knowledge of their own language and culture. They will also be able to make some generalizations about languages and cultures based on their experiences and those of their classmates, who may have a variety of cultural backgrounds. This will provide students with an understanding of diversity within both a global and a Canadian context.

## General Outcome for Global Citizenship

Students will acquire the knowledge, skills and attitudes to be effective **global citizens**, through the exploration of the cultures of the German-speaking world.

# Strategies

## STRATEGIES

Under the Strategies heading are specific outcomes that will help students learn and communicate more **effectively**. Strategic competence has long been recognized as an important component of communicative competence. The learning outcomes that follow deal not only with compensation and repair strategies, important in the early stages of language learning when proficiency is low, but with strategies for language learning, language use in a broader sense, as well as general learning strategies that help students acquire content. Although people may use strategies unconsciously, the learning outcomes deal only with the **conscious use** of strategies.

The strategies are grouped under three cluster headings—see the illustration on the preceding page. Under each of these headings there are several strands that show the development of awareness and skill in using strategies from course to course. Each strand, identified by a strand heading at the left end of the row, deals with a specific category of strategy. Language learning and general learning strategies are categorized as cognitive, metacognitive and social/affective. The language use strategies are organized by communicative mode: receptive, productive, interactive.

The strategies that students choose depend on the task they are engaged in as well as on other factors, such as their preferred learning style, personality, age, attitude and cultural background. Strategies that work well for one person may not be effective for another person, or may not be suitable in a different situation. For this reason it is not particularly useful to say that students should be aware of, or able to use, a specific strategy in a particular course. Consequently, the specific outcomes describe the students' knowledge of, and ability to use, general types of strategies. More specific strategies for each general category or type are included in the sample list of strategies below. The specific strategies provided in the sample list **are not prescriptive** but are provided as an illustration of how the general strategies in the specific outcomes might be developed.

Teachers need to know and be able to demonstrate a broad range of strategies from which students are then able to choose in order to communicate effectively. Strategies of all kinds are best taught in the context of learning activities where students can apply them immediately and then reflect on their use.

## SAMPLE LIST OF STRATEGIES

### Language Learning Strategies

#### Cognitive

- listen attentively
- perform actions to match words of a song, story or rhyme
- learn short rhymes or songs, incorporating new vocabulary or sentence patterns
- imitate sounds and intonation patterns
- memorize new words by repeating them silently or aloud
- seek the precise term to express meaning
- repeat words or phrases in the course of performing a language task
- make personal dictionaries
- experiment with various elements of the language
- use mental images to remember new information
- group together sets of things—vocabulary, structures—with similar characteristics
- identify similarities and differences between aspects of the German language and own language
- look for patterns and relationships
- use previously acquired knowledge to facilitate a learning task
- associate new words or expressions with familiar ones, either in German or in own language
- find information, using reference materials like dictionaries, textbooks and grammars
- use available technological aids to support language learning; e.g., cassette recorders, computers
- use word maps, mind maps, diagrams, charts or other graphic representations to make information easier to understand and remember

- place new words or expressions in a context to make them easier to remember
- use induction to generate rules governing language use
- seek opportunities outside of class to practise and observe
- perceive and note down unknown words and expressions, noting also their context and function

### **Metacognitive**

- check copied writing for accuracy
- make choices about how you learn
- rehearse or role-play language
- decide in advance to attend to the learning task
- reflect on learning tasks with the guidance of the teacher
- make a plan in advance about how to approach a language learning task
- reflect on the listening, reading and writing process
- decide in advance to attend to specific aspects of input
- listen or read for key words
- evaluate own performance or comprehension at the end of a task
- keep a learning log
- experience various methods of language acquisition, and identify one or more considered to be particularly useful personally
- be aware of the potential of learning through direct exposure to the language
- know how strategies may enable coping with texts containing unknown elements
- identify problems that might hinder successful completion of a task, and seek solutions
- monitor own speech and writing to check for persistent errors
- be aware of own strengths and weaknesses, identify own needs and goals, and organize strategies and procedures accordingly

### **Social/Affective**

- initiate or maintain interaction with others
- participate in shared reading experiences
- seek the assistance of a friend to interpret a text
- reread familiar self-chosen texts to enhance understanding and enjoyment

- work cooperatively with peers in small groups
- understand that making mistakes is a natural part of language learning
- experiment with various forms of expression, and note their acceptance or nonacceptance by more experienced speakers
- participate actively in brainstorming and conferencing as prewriting and postwriting exercises
- use self-talk to feel competent to do the task
- be willing to take risks, and try unfamiliar tasks and approaches
- repeat new words and expressions occurring in own conversations, and make use of these new words and expressions as soon as appropriate
- reduce anxiety by using mental techniques, such as positive self-talk or humour
- work with others to solve problems, and get feedback on tasks
- provide personal motivation by arranging own rewards when successful

### **Language Use Strategies**

#### **Receptive**

- determine the purpose of listening
- assess own information needs before listening, viewing or reading
- prepare questions or a guide to note down information found in the text
- make predictions about what you expect to hear or read based on prior knowledge and personal experience
- listen selectively based on purpose
- listen or look for key words
- use key content words or discourse markers to follow an extended text
- use skimming and scanning to locate key information in texts
- use illustrations to aid reading comprehension
- infer probable meanings of unknown words or expressions from contextual clues
- use knowledge of the sound–symbol system to aid reading comprehension
- reread several times to understand complex ideas
- observe gestures, intonation and visual supports to aid comprehension
- summarize information gathered

- make connections between texts on the one hand and prior knowledge and personal experience on the other

### **Productive**

- mimic what the teacher says
- use nonverbal means to communicate
- copy what others say or write
- use words visible in the immediate environment
- be aware of and use the steps of the writing process: prewriting (gathering ideas, planning the text, researching, organizing the text), writing, revision (rereading, moving pieces of text, rewriting pieces of text), correction (grammar, spelling, punctuation), publication (reprinting, adding illustrations, binding)
- use various techniques to explore ideas at the planning stage, such as brainstorming or keeping a notebook or log of ideas
- use familiar repetitive patterns from stories, songs, rhymes or media
- use illustrations to provide detail when producing own texts
- use familiar sentence patterns to form new sentences
- take notes when reading or listening to assist in producing own text
- compensate for avoiding difficult structures by rephrasing
- use resources to increase vocabulary
- use descriptions, explanations or various words and phrases to compensate for lack of specific terms (circumlocution)
- use a variety of resources to correct texts; e.g., personal and commercial dictionaries, checklists, grammars
- apply grammar rules to improve accuracy at the correction stage
- revise and correct final version of text

### **Interactive**

- indicate lack of understanding verbally or nonverbally; e.g., *Entschuldigung, Wie bitte?, Das habe ich nicht verstanden*, raised eyebrows, blank look
- interpret and use a variety of nonverbal cues to communicate; e.g., mime, pointing, gestures, drawing pictures

- ask for clarification or repetition when you do not understand; e.g., *Was meinen Sie damit?, Wiederholen Sie, bitte!*
- ask for confirmation that a form used is correct; e.g., *Kann man das sagen?, Wie heißt das auf Deutsch?*
- use other speakers' words in subsequent conversations
- use descriptions, explanations or various words and phrases to compensate for lack of specific terms (circumlocution)
- assess feedback from a conversation partner to recognize if a message has been understood
- start again, using a different tactic, when communication breaks down
- use fillers, hesitation devices and gambits to sustain conversations; e.g., *Na ja, gut, nicht wahr*

### **General Learning Strategies**

#### **Cognitive**

- classify objects and ideas according to their attributes; e.g., red objects and blue objects, or animals that eat meat and animals that eat plants
- use models
- connect what is already known with what is being learned
- experiment with and concentrate on one thing at a time
- focus on and complete learning tasks
- record key words and concepts in abbreviated form—verbal, graphic or numerical—to assist with performance of a learning task
- use mental images to remember new information
- distinguish between fact and opinion when using a variety of sources of information
- formulate key questions to guide research
- make inferences, and identify and justify the evidence on which these inferences are based
- use word maps, mind maps, diagrams, charts or other graphic representations to make information easier to understand and remember
- seek information through a network of sources, including libraries, the Internet, individuals and agencies
- use previously acquired knowledge or skills to assist with a new learning task

### **Metacognitive**

- reflect on learning tasks with the guidance of the teacher
- choose from various study techniques
- discover how own efforts can affect learning
- reflect upon own thinking processes and how you learn
- decide in advance to attend to the learning task
- divide an overall learning task into a number of subtasks
- make a plan in advance about how to approach a task
- identify own needs and interests
- manage own physical working environment
- keep a learning journal, such as a diary or a log
- develop criteria for evaluating own work
- work with others to monitor own learning
- take responsibility for planning, monitoring and evaluating learning experiences

### **Social/Affective**

- watch others' actions and copy them
- seek help from others
- follow own natural curiosity and intrinsic motivation to learn
- participate in cooperative group learning tasks
- choose learning activities that enhance understanding and enjoyment
- be encouraged to try, even though mistakes may be made
- take part in group decision-making processes
- use support strategies to help peers persevere at learning tasks; e.g., offer encouragement, praise, ideas
- take part in group problem-solving processes
- use self-talk to feel competent to do the task
- be willing to take risks, and try unfamiliar tasks and approaches
- monitor own level of anxiety about learning tasks, and take measures to lower it if necessary; e.g., deep breathing, laughter
- use social interaction skills to enhance group learning activities

### General Outcome for Strategies

Students will know and use various strategies to maximize the **effectiveness** of learning and communication.
