Preface

The French as a Second Language (FSL) Program Articulation has been prepared by Alberta Education to assist the teachers with the implementation of the Nine-year FSL Program of Studies. It is meant to accompany the FSL Nine-year Program of Studies. We welcome your input and invite you to fill in the Field Review form which you will find at the back of this document.

What Is the Purpose of the *French as a Second Language Program Articulation*?

The FSL Program Articulation assists teachers with the interpretation, planning and implementation of the general and specific learner outcomes from the program of studies. As well, this document supports teachers as they work toward the over-arching goal of the 2004 French as a Second Language Program of Studies, which is to produce students who are able to function in the French language and culture beyond the confines of the classroom. (*French as a Second Language Nine-year Program of Studies*, Alberta Education, p. 8)

The *FSL Program Articulation* is comprised of three distinct parts:

1. Scope and Sequence

The Scope and Sequence is a consolidation of general and specific learner outcomes used in planning and developing for instructional purposes. It provides teachers the breadth of the program of studies in table format.

2. Communicative Functions (Targets)

The Communicative Functions (Targets) document articulates, specifically, what students do in French at each grade level. The numbered Communicative Functions (Targets) statements used in the Program Articulation are not found in the FSL program of studies; however, the headings and statements used have been introduced in the *Program Articulation* document to clarify the purpose and intent of the general and specific learner outcomes of the program of studies.

The use of general learner outcomes, cluster headings, Communicative Functions (Targets) and specific learner outcomes provides teachers with a comprehensive approach to planning instruction and assessment.

3. Planning for Communication

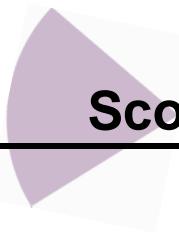

Planning for Communication is a document to help teachers plan for communicative activities. Teachers can use Planning for Communication to record information about their instruction and assessment.

Scope and Sequence

Introduction

The Scope and Sequence shows the progression of outcomes from the FSL Program of studies.

The Scope and Sequence clarifies what students know and can do in French at each grade level in the four general outcomes:

- communication
- language
- culture
- language learning strategies.

What Is the Scope and Sequence?

The Scope and Sequence is a consolidation of specific learner outcomes used in planning and developing for instructional purposes. It gives teachers the breadth of the program of studies in table format.

Within the Scope and Sequence, Communicative Functions (Targets) statements are introduced. These headings and statements clarify the purpose and intent of the general and specific learner outcomes of the FSL program of studies. Although the cluster headings and the numbered Communicative Functions (Targets) statements are not found in the FSL program of studies, these statements provide teachers with a comprehensive approach to planning instruction and assessment.

The six cluster headings and the specific Communicative Functions (Targets) statements for grades 4 to 6 are:

Grade 4

- 1. To impart and receive information**
 - 1.1 Share basic information.
 - 1.2 Identify concrete people, places and things.
- 2. To express emotions and personal perspectives**
 - 2.1 Express simple preferences.
 - 2.2 Express a personal response.
 - 2.3 Ask about and express basic emotions and feelings.
- 3. To get things done**
 - 3.1 Indicate basic needs and wants.
 - 3.2 Give and respond to simple oral instructions or commands.
 - 3.3 Ask for permission.
 - 3.4 Respond to offers, invitations and instructions.
 - 3.5 Ask or offer to do something.
 - 3.6 Manage turn taking.
 - 3.7 Encourage other group members to act appropriately.
- 4. To form, maintain and change interpersonal relationships**
 - 4.1 Exchange greetings and farewells.
 - 4.2 Address a new acquaintance and introduce themselves.
 - 4.3 Exchange some basic information about themselves.
- 5. To extend their knowledge of the world**
 - 5.1 Investigate the immediate environment.
 - 5.2 Gather simple information.
 - 5.3 Organize items in different ways.
 - 5.4 Experience problem-solving situations in the classroom.
 - 5.5 Listen attentively to the opinions expressed.
 - 5.6 Respond sensitively to the ideas and products of others.

6. For imaginative purposes and personal enjoyment

- 6.1 Use the language for fun.
- 6.2 Use the language creatively.
- 6.3 Use the language for personal enjoyment.

Grade 5

1. To impart and receive information

- 1.1 Ask for and provide information.
- 1.2 Respond to simple, predictable questions.
- 1.3 Describe people, places and things.

2. To express emotions and personal perspectives

- 2.1 Identify favourite people, places or things.
- 2.2 Express a personal response to a variety of situations.
- 2.3 Identify emotions and feelings.

3. To get things done

- 3.1 Suggest a course of action and respond to a suggestion.
- 3.2 Make and respond to a variety of simple requests.
- 3.3 Seek, grant or withhold permission.
- 3.4 Indicate a choice from several options.
- 3.5 Express a wish or a desire to do something.
- 3.6 Ask for help or clarification of what is being said or done in the group.
- 3.7 Suggest, initiate or direct action in group activities.

4. To form, maintain and change interpersonal relationships

- 4.1 Initiate relationships.
- 4.2 Apologize and refuse politely.

5. To extend their knowledge of the world

- 5.1 Investigate the immediate environment.
- 5.2 Make and talk about personal observations.
- 5.3 Sequence items in different ways.
- 5.4 Define a problem and search for solutions.
- 5.5 Choose between alternative solutions.
- 5.6 Recognize differences of opinion.

6. For imaginative purposes and personal enjoyment

- 6.1 Use the language for fun.
- 6.2 Use the language creatively.
- 6.3 Use the language for personal enjoyment.

Grade 6

1. To impart and receive information

1.1 Describe people, places, things and series or sequence of events or actions.

2. To express emotions and personal perspectives

2.1 Inquire about and express likes and dislikes.

2.2 Inquire about, record and share personal experiences that involve an emotion or feeling.

3. To get things done

3.1 Encourage or discourage others from a course of action.

3.2 Give and follow a simple sequence of instructions.

3.3 Make an offer and an invitation and respond to offers and invitations made by others.

3.4 Inquire about and express ability and inability to do something.

3.5 Encourage other group members to participate.

3.6 Assume a variety of roles and responsibilities as group members.

3.7 Negotiate, in a simple way, with peers in small group tasks.

3.8 Offer to explain or clarify.

4. To form, maintain and change interpersonal relationships

4.1 Talk about themselves and respond to the talk of others by showing attention and interest.

5. To extend their knowledge of the world

5.1 Explore alternative classification systems and criteria for categories.

5.2 Discuss relationships and patterns.

5.3 Compare and contrast items in simple ways.

5.4 Compose questions to guide research.

5.5 Identify sources of information.

5.6 Record observations.

5.7 Understand and use the steps in the problem-solving process.

5.8 Express their views on a variety of topics within their direct experience.

5.9 Gather opinions on a topic within their direct experience.

6. For imaginative purposes and personal enjoyment

6.1 Use the language for fun and to interpret simple humour.

6.2 Use the language creatively and for aesthetic purposes.

6.3 Use the language for personal enjoyment.

[This page was left blank intentionally]

What Is the Purpose of the Scope and Sequence?

The Scope and Sequence supports the French as a Second Language (FSL) Program of Studies. This portion of the document shows how specific outcomes progress through grades 4, 5 and 6.

There are four components in the Scope and Sequence, each representing a general outcome from the program of studies:

Communication

This component demonstrates a progression of the Communicative Functions (Targets)*. It demonstrates how specific outcomes from the program of studies support the Communicative Functions (Targets).*

Language

This component demonstrates a progression of specific outcomes to show what students know and are to do, in terms of grammar and vocabulary, in each grade, within a communicative context.

Culture

This component incorporates fields and subfields of experience that can be considered relevant to learning about culture. It describes the intent and purpose of the specific outcomes.

Language Learning Strategies

This component demonstrates strategies that can be applied in each grade and includes specific outcomes from the program of studies.

How Is the Scope and Sequence Used?

The Scope and Sequence is used by teachers:

- to enhance their understanding of the progression of learner outcomes from the FSL Program of Studies.
- as a reference when using the Communicative Functions (Targets)* and Planning for Communication* sections within this document.

* See the Table of Contents for information on the Communicative Functions (Targets) and Planning for Communication sections of this document.

Communication

General Outcome for Communication

Students will use their knowledge of French to understand and/or to express a message effectively in various situations for a variety of purposes.

The overarching goal of the nine-year program of studies is to develop students who are sufficiently competent in French to function in the language and culture outside the confines of the classroom. The Communication component is crucial to achieving this goal.

The Communication component encompasses four language skills:

Listening Comprehension (LC): In grades 4 to 6, students demonstrate understanding of key words and ideas contained in simple, concrete, oral texts. These texts can be authentic Francophone oral texts, e.g., radio announcements, television broadcasts, but will mostly be adapted texts; e.g., an oral text tailored to meet the proficiency level of the second language learner.

Students can indicate they understand key words and ideas through the use of familiar phrases, single words, answering yes/no, drawing a picture or other graphic representation and using English, when appropriate.

Reading Comprehension (RC): In grades 4 to 6, students demonstrate understanding of key words and ideas in simple, concrete adapted or authentic texts. Students can indicate they understand key words and phrases through the use of simple words and phrases, underlining, highlighting, matching, drawing, physical actions and using English, when appropriate.

Oral Production (OP): In grades 4 to 6, students may express a simple oral message by using simple, concrete sentences, based on an available model, familiar phrases they have memorized and single words. When appropriate, gestures can be used to sustain or enhance a message.

These messages can be expressed in some of the following contexts:

- simple, spontaneous interactions between students; e.g., greetings
- simple interactions between students, based on provided structures; e.g., student A asks a modelled question, student B responds
- oral presentations where students present a rehearsed oral production to classmates and/or the teacher.

Written Production (WP):

In grades 4 to 6, students may express simple, written messages by writing simple, concrete sentences, writing sentences based on a model, copying, labelling and substituting words. Both authentic, e.g., clothing tags, newspaper weather reports, emails, and adapted texts, e.g., part of a song that is rewritten with different words, a poem that has some words that have been substituted, may be produced.

Language

General Outcome for Language

Students will use, with accuracy, knowledge of linguistic elements of the French language to fulfill their communicative intents.

To carry out authentic communicative tasks, students require a repertoire of linguistic tools that they will use to understand others' messages and to convey their own messages. These linguistic tools include:

- the sound system of the language, including pronunciation of vowels and consonants, intonation, rhythm and stress; i.e., phonology
- the writing system of the language, such as the correlation between sounds and spelling and the rules of spelling as well as any mechanical conventions, such as capitalization and punctuation; i.e., orthography
- the words used to carry out a communicative task; i.e., vocabulary
- grammatical structure, such as conjugation of verbs and gender agreement of adjectives, and grammar at the sentence level (i.e., syntax), such as word order, types of sentences and the way sentences are constructed; i.e., grammar.

These linguistic tools serve to support communication. In order to meet the Communicative Functions (Targets) articulated in the Communication component, students require the necessary linguistic knowledge.

Some teaching points to consider when providing linguistic tools to students:

- Introduce, practise and assess linguistic tools through communicative activities, wherever possible.
- Students will acquire vocabulary and grammatical rules at different rates; therefore, particular words and rules should be practised several times and in a variety of ways. Teachers continually assess students' progress to determine if further practice is necessary and when it is appropriate to evaluate students' ability to use vocabulary and grammatical rules.
- Particularly in grades 4 to 6, modelled situations are necessary for students to use some expressions or grammatical structures successfully. In a modelled situation, the linguistic tool is consistently provided and immediately accessible to students; e.g., written on the board, provided to students on a sheet of paper, posted in the classroom.
- Sometimes, students learn about a linguistic tool (e.g., the *savoir*) and, sometimes, they apply the linguistic tool (e.g., the *savoir-faire*). The knowledge of linguistic tools and the application of linguistic tools differ but both are needed to ensure students can effectively communicate. It is generally appropriate to use English to teach students in grades 4 to 6 the knowledge of linguistic tools but students apply and practise the linguistic tools while using French in a communicative context.

Culture

General Outcome for Culture

Students will use their knowledge of different Francophone cultures and their own culture to interact within these cultures.

Developing cultural knowledge and skills is a lifelong process and involves learning about the cultures of others as well as one's own culture.

To become effective users of the French language, students require an understanding of Francophone cultures and how language and culture are intertwined.

In the Culture component, students:

- **acquire specific knowledge about Francophone cultures**
Sometimes, this knowledge can be acquired directly in the French language, such as singing a birthday song in French. These knowledge outcomes may be best acquired in English, such as learning about the difference between calendars in France and Canada.
- **apply knowledge about Francophone cultures**
Generally, this involves students becoming aware of the elements of Francophone cultures around them. Teachers will find it helpful to enrich the classroom environment with cultural displays, artefacts and/or authentic resources to teach these outcomes.
- **build general cultural awareness**
This is an opportunity for teachers to choose four holidays or celebrations important to students and use them as a basis for learning French throughout the school year.
- **become aware of personal opportunities associated with learning French**
Some of these outcomes are most appropriately taught in French and others may be taught in English.
- **practise sociolinguistic conventions**
These conventions are practised while using French.
- **build French language awareness**
These outcomes involve examining and understanding some unique features of the French language.

Language Learning Strategies

General Outcome for Language Learning Strategies

Students will use their knowledge of strategies to enhance learning and to communicate in French.

To learn any new language successfully, learners employ a variety of strategies. These strategies allow the learner to acquire the language more efficiently and to feel more independent and confident.

As students progress through the grades, the types of strategies teachers introduce will gradually become more sophisticated. In the earlier grades, teachers assist students to recognize and experiment with simple strategies. Older students should be able to sort and select from a number of strategies and apply those that work best for them in any communicative situation. FSL teachers should teach various strategies to students explicitly to ensure they are able to apply strategies effectively.

The types of strategies teachers will provide to students in the FSL Program of Studies are:

Cognitive Strategies	Cognitive strategies involve thinking about the content of the task and what learning will take place. They focus on what needs to be done to complete the language task.
Socio-affective Strategies	Socio-affective strategies involve thinking about how one feels about the learning and how one learns with others. They focus on working effectively with others and managing emotions in relation to the language task.
Metacognitive Strategies	Metacognitive strategies involve thinking about managing the learning. They focus on how to complete the language task.
Memory Strategies	Memory strategies involve using ways to remember language structures and key words to use during the language task. They focus on remembering grammar and vocabulary.

*The strategies assigned for each grade in this document represent a suggested distribution of strategies. Teachers make decisions regarding which strategies are most appropriate for their students in any particular grade.

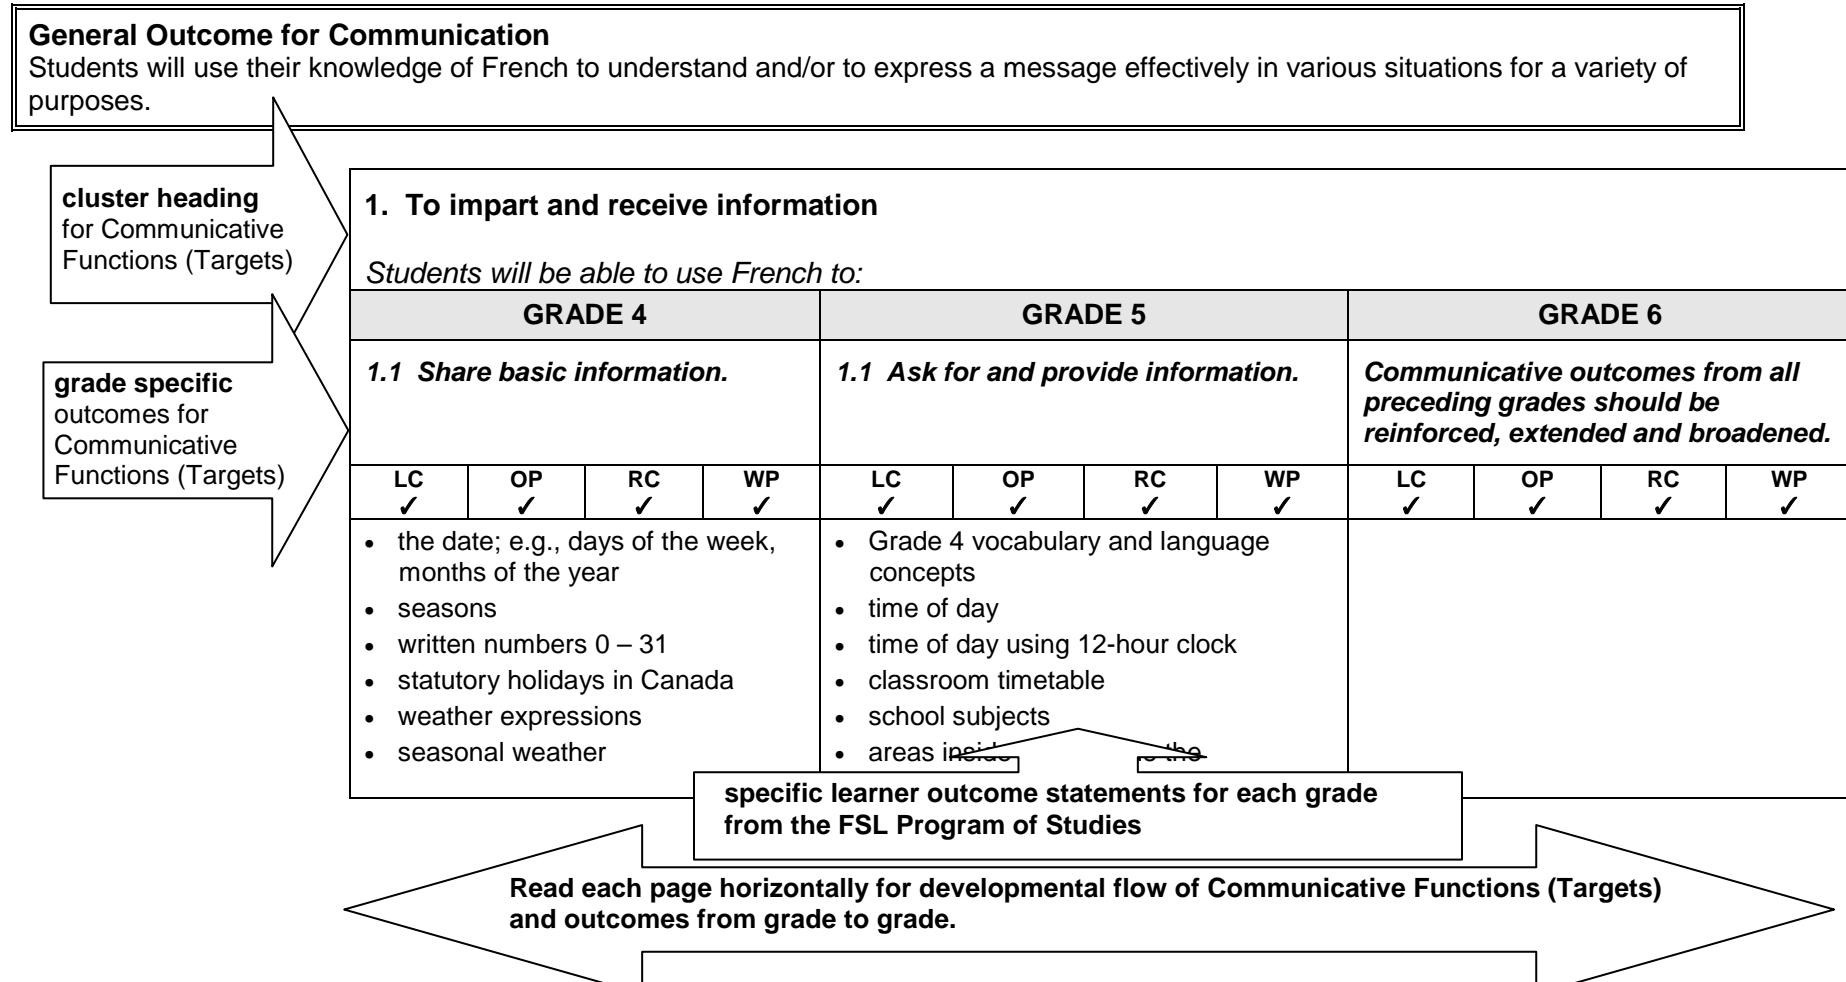

Scope and Sequence

Communication

Reading the Communication Component

The Communicative Functions (Targets) and/or learner outcomes are represented and illustrate the intended developmental flow for French from grades 4 to 6.

Note: Each page should be read horizontally for developmental flow of the communicative functions (targets) and/or learner outcomes from the FSL Program of Studies, from grade to grade.

French as a Second Language – Scope and Sequence – Grades 4 to 6

Scope and Sequence

Language Learning Strategies

Reading the Language Learning Strategies Component

The Language Learner Strategies and/or learner outcomes are represented and illustrate the intended developmental flow for French from grades 4 to 6.

Note: Each page should be read horizontally for developmental flow of the Language Learner Strategies (LLS) and/or learner outcomes, from grade to grade. Although there is a suggested developmental flow per grade, teachers should note that these strategies may be revisited at different points in the three year time period, depending on the learners.

General Outcome for Language Learning Strategies

Students will use their knowledge of strategies to enhance learning and to communicate in French.

and subheadings
for LLS

grade specific
outcomes
for LLS

1. Comprehension Strategies

1.1 Cognitive

GRADE 4

Students develop and use **simple cognitive strategies, with guidance**, to facilitate the comprehension of an oral or written message:

LC OP RC WP

- guess the meaning of an unknown word or expression
- use visual clues, e.g., pictures, gestures, illustrations, and auditory clues; e.g., street noises,

GRADE 5

Students develop and use **a variety of simple cognitive strategies, with guidance**, to facilitate the comprehension of an oral or written message:

LC OP RC WP

- use appropriate strategies from Grade 4
- identify cognates: e.g., *forest/forêt; carnival/carnaval*

LLS may be revisited at different points in the three year time period, depending on the learners.

Students develop and use **a variety of cognitive strategies, with guidance**, to facilitate the comprehension of an oral or written message:

LC OP RC WP

- use appropriate strategies from grades 4 to 5
- predict what information a text may contain

present meaning by using
mental images, illustrations or

specific learner outcome statements for each grade

Read each page horizontally for developmental flow of language learning strategies and outcomes from grade to grade. Revisit strategies, as needed.

Grade Level Communicative Functions (Targets)

Introduction

Communicative Functions (Targets) focus exclusively on the students' use of the French language. This section articulates what students are able to do in French at each grade level.

French as a Second Language

Grades 4, 5, 6

Communicative Functions (Targets)

What is the Communicative Functions (Targets) Section?

The Communicative Functions (Targets) section articulates what students are able to do in French in each grade and focuses exclusively on the use of French.

In the Communicative Functions (Targets) section, there are five columns:

Fields/Subfields	Each field and subfield from the program of studies is represented. Teachers who want to teach other fields of experience that may be relevant to their students; e.g., my hobbies, TV viewing, music/art, current sporting events, can teach these optional fields whenever they choose.
Communication Functions (Targets)	Communicative Functions (Targets) are communicative goals or intents for students to achieve. These targets are in context of appropriate fields and subfields of experience.
Illustrative Examples	Illustrative Examples demonstrate how teachers can help students achieve the Communicative Functions (Targets). Teachers can choose any of the examples presented, depending on their specific teaching context. Teachers should also feel free to use examples other than those provided.
Culture	Outcomes from the General Outcome of Culture that apply directly to the Communicative Functions (Targets) are presented. Outcomes that do not apply to a communicative situation will be taught at another time.
Language Learning Strategies	Specific strategies have not been aligned to any particular Communicative Function (Target) as strategies can be taught and practised at any time, depending on the teacher's instructional goal(s).

Although the majority of the outcomes from the FSL Program of Studies are represented in the Communicative Functions (Targets) section, not all specific outcomes are present. Only those outcomes that fulfill communicative intents in French have been included.

How Is the Communicative Functions (Targets) Section Used?

The Communicative Functions (Targets) section is used by teachers:

- to gain a deeper understanding of what students should be able to do in French in grades 4, 5 and 6
- as a reference, when using the Planning for Communication section or when creating their own lesson, unit and/or year plan.

Grade Level Communicative Functions (Targets)

Grade 4

Communicative Functions (Targets) focus exclusively on the students' use of the French language. This section articulates what students are able to do in French at each grade level.

For all fields and subfields:	<p>3.5 Ask or offer to do something. ▪ throughout all fields and subfields, where appropriate</p> <p>3.6 Manage turn taking. ▪ throughout all fields and subfields, where appropriate</p> <p>3.7 Encourage other group members to act appropriately. ▪ throughout all fields and subfields, where appropriate</p> <p>6.1 Use the language for fun. ▪ throughout all fields and subfields, where appropriate</p> <p>6.2 Use the language creatively. ▪ throughout all fields and subfields, where appropriate</p> <p>6.3 Use the language for personal enjoyment. ▪ throughout all fields and subfields, where appropriate</p>	<ul style="list-style-type: none"> ▪ <i>Est-ce que je peux _____ ? Je peux _____. Je peux aider.</i> ▪ <i>C'est le tour à qui? C'est le tour à _____. C'est à mon/son/ton tour. Mon/son/ton tour. Je suis/Tu es/Il est/Elle est le premier/la première.</i> ▪ <i>Bravo! Continue. C'est bien. Tranquillement. Écoutez!</i> ▪ Learn simple riddles, songs and nursery rhymes. Play simple games, do action songs, dance and make simple crafts that relate to the field and subfield studied. ▪ Participate in activities that play on the sounds and rhythms of the language, create a picture story with captions, alter the words to a familiar song or rhyme that relates to the field and subfields studied. ▪ Make a personal dictionary of favourite words with illustrations. Read or create simple books. Watch a video. Listen to favourite songs. Present writing or music to another class that relates to the field and subfields studied. 		<p>Language learning strategies are to be incorporated throughout the fields of experience.</p> <p>Students will know and use strategies to maximize the effectiveness of learning and communication in French.</p>

Grade Level Communicative Functions (Targets)

Grade 5

Communicative Functions (Targets) focus exclusively on the students' use of the French language. This section articulates what students are able to do in French at each grade level.

Planning for Communication

Introduction

Planning for Communication is a tool for FSL teachers to use when recording information about how students have demonstrated the communicative targets. Teachers can use Planning for Communication to track students' progress in relation to different outcomes. This information helps guide instruction and assessment.

Planning for Communication is intended to be a companion document for Communicative Functions (Targets) and, therefore, focuses exclusively on the use of the French language.

French as a Second Language

Grades 4, 5 and 6

Planning for Communication

What Is the Planning for Communication Document?

Planning for Communication is a hands-on tool to help teachers plan for communicative activities and to record information regarding what students can do in French.

How Is the Planning for Communication Used?

There is space provided in the Planning for Communication section for teachers to record which language skill is being addressed for any particular Communication Function (Target).

When teachers address a Communication Function (Target), they can write a check mark or other symbol and write any relevant information in the spaces provided at the top of the page.

Some of the information teachers may want to record in regard to the Communication Functions (Targets) includes:

- date the target was addressed
- name of the activity used
- type of assessment recording tool used to record evidence of learning; e.g., observational checklist, anecdotal records, rating scale, rubric.

When indicating that a particular Communication Function (Target) has been addressed, teachers may find it helpful to use different colours or symbols to indicate their overall impression of how well a target has been achieved. For example, a red check mark indicates students are achieving a target in a rudimentary fashion. A blue check mark indicates students are able to achieve a target with more proficiency but still require assistance. A black check mark indicates students are able to achieve the target independently.

Teachers should feel free to use the Planning for Communication section in any way that is useful to them.

On the following page is an illustrative example of how Planning for Communication can be used. In the excerpt shown, the teacher indicates which outcomes are addressed through a particular activity and how students' performances are assessed. Only a few communicative outcomes have been shown in this excerpt but, in a full document, several other outcomes would be indicated for the same activities.

Sample of how to use Planning for Communication
