\* Due to the COVID-19 pandemic, no reportable data is available for the 2019/2020 and the 2020/2021 school years.

\*\* The 2021/2022 results do not include the results of the January 2022 diploma exam administration as this administration was cancelled due to the COVID-19 context. As such, the 2021/2022 results are not comparable with previous years' results. Caution should be exercised when interpreting and comparing the results over time.

- +, =, - The percentage of students meeting the standard is significantly above (+), not significantly different from (=), or significantly below (-) the previous three-year average. A difference is reported as significant when there is a 5% or smaller probability that a difference of that size could occur by chance. The fewer the number of students, the larger the difference must be from the expectation before it is considered significant. Significance is not calculated for fewer than 6 students.
- Given there is no reportable data for 2019/2020, 2020/2021 and January 2022, the results for 2021/2022 and 2022/2023 are not evaluated against the previous three-year average.
- For an explanation of how these statistics were calculated, see "**Guidelines for Interpreting Diploma Examinations Multiyear Reports.**"
- Provincial data in this report is for the entire school year.

\* Due to the COVID-19 pandemic, no reportable data is available for the 2019/2020 and the 2020/2021 school years.

\*\* The 2021/2022 results do not include the results of the January 2022 diploma exam administration as this administration was cancelled due to the COVID-19 context. As such, the 2021/2022 results are not comparable with previous years' results. Caution should be exercised when interpreting and comparing the results over time.

- +, =, - The percentage of students meeting the standard is significantly above (+), not significantly different from (=), or significantly below (-) the previous three-year average. A difference is reported as significant when there is a 5% or smaller probability that a difference of that size could occur by chance. The fewer the number of students, the larger the difference must be from the expectation before it is considered significant. Significance is not calculated for fewer than 6 students.
- Given there is no reportable data for 2019/2020, 2020/2021 and January 2022, the results for 2021/2022 and 2022/2023 are not evaluated against the previous three-year average.
- For an explanation of how these statistics were calculated, see "**Guidelines for Interpreting Diploma Examinations Multiyear Reports.**"
- Provincial data in this report is for the entire school year.
